RELEVANT PROJECTS

Nomad Horizon | Online Service Reservation and Administration Portal

It gives Digital Nomads options like book a service online, track their order and avail them on their journey. It is made with TypeScript, Next.js, Redux, RTK Query, Prisma and PostgreSQL

Live Site | **Frontend Repository** | **Backend Repository**

- Implemented role-based access control to ensure secure and customized user interaction
- Notification hub where customers receive real-time updates on booking and confirmations
- Central dashboard for admins to monitor website activity, manage user, service, and bookings with options for schedule adjustments

Second Time Around | Mobile Reselling Platform

Through this site people can list their product to sell and buy from other people. The platform is built with React, JavaScript, Tailwind CSS and Firebase.

Live Site | **Frontend Repository** | **Backend Repository**

- Added different dashboard setup based on the user role to ensure feature consistency
- Appended secure payment gateway system with stripe to make transaction online
- Implemented advertising section so that seller can advertise the product on home page
